Sales Force increased

We are delighted to announce two new recent sales appointments. Andrew Buffrey joins as Commercial Manager for the London area and Julie Lester as North West Area Sales Manager. Andrew was previously Architectural Sales Manager for Cosentino and has extensive experience in the architectural and interior design sectors. Julie has had a successful career in sales and key account management.

Welcome to On The Surface

Welcome to our latest newsletter which we hope you'll enjoy reading.

David Clouting is now LG Hausys largest distributor worldwide for Deco foil, and sell a range of innovative products including veneers, laminates and edge banding specifically designed for the furniture production industry.

We have also recently launched a new range of LG Hausys luxury vinyl floor tiles – DECOTILE and an eco friendly cladding

& decking system called Woozen, these and other products are featured in this newsletter.

We have also increased our sales force due to the introduction of new products and to help us develop into new markets. Our new website is now fully operational and we hope you find it a good point for product information.

DECOTILE launched

DECOTILE manufactured by LG Hausys and just launched in the UK by David Clouting is a superb range of luxury vinyl floor tiles available in natural wood, stone, marble or a slate finish.

Combined with the durability, longevity and cost-effectiveness of vinyl and with warranties from 10 to 20 years depending upon usage requirements, DECOTILE uniquely creates the feeling of walking on real natural materials but with the comfort and warmth of luxury vinyl

flooring. For further information contact marketing@davidclouting.co.uk

Eco Cladding & Decking System

David Clouting have launched a unique cladding & decking system manufactured from natural wood flour and environmentally friendly olefin to provide the ultimate in sustainable products.

Woozen, manufactured by LG Hausys, offers all the aesthetic values of wood combined with high performance features. It is extremely hardwearing, it will not rot, is highly resistant to weathering and insects, requires no painting, varnishing or cleaning and is easy and quick to install.

Requiring virtually no maintenance and delivering excellent whole life costings in comparison to timber based products, Woozen has a zero carbon footprint in contrast to wood decking for example which ensures that it will deliver on both

performance and sustainability issues. Woozen is easy to fabricate onsite and its attractive appearance makes it ideally suited for a wide range of commercial, industrial, retail, leisure and consumer cladding and decking applications.

At the end of its natural life Woozen can be totally recycled, further underpinning its zero carbon footprint and whole life costing credentials.

Deco Foil Woodgrain effects

Finnish Pine – A highly realistic wood look foil with the tactile feel of real wood veneer. The Finnish Pine range is an incredibly versatile and suitable for a wide range of furniture applications. We now offer four new colours three of which are co-ordinated with Egger's Avola MFC's – White, Champagne & Grey. The forth colour Anthracite, compliments well with many colour schemes.

Contact us if you would like an A4 pack of Finnish Pine samples.

STOP PRESS!

Odessa UJY02-Q3M now has a matching MFC/MDF from Kronospan - product reference D6540 NT Odessa Golden Oak. Pfleiderer also have a matching MFC/MDF - product reference R4214 Odessa Oak.

Zenolite

Zenolite is a high gloss acrylic decorative panel that offers an exciting, eco friendly, colourful, tough and light weight alternative to more traditional interior surface materials such as back painted glass, ceramic, aluminium and wood. Zenolite features a palette of 10 exciting colours which provides endless possibilities to create inspirational designs for a wide variety of applications including: kitchens, bathrooms, showrooms, hotel and office reception areas and foyers.

It's glass, but not as we know it

Glaser is an interior glass film from LG Hausys designed to be laminated onto the back of a glass sheet to provide the ultimate high gloss finish - both in looks and surface performance.

Utilising high pearl printing techniques to give stunning 3D effects, Glaser is ideal for domestic and commercial interior applications including: Splash backs, Kitchen and Bedroom doors, Wardrobe Doors, Flooring, Wall Panels, Work surfaces, Table tops, Headboards, Radiator covers, Hotel and Office reception areas and Bars and Restaurant.

Glaser is certified to act as a safety film, achieving European EN12600: 2003-04 Classification.

We offer a range of contemporary Glaser film designs like Ash Gold (featured) to allow the designer to create stylish room settings or individual feature walls.

Exhibition Update

David Clouting were at two exhibitions earlier this year – The Surface Design Show at the Business Design Centre in Islington and the Eco Build exhibition in ExCel, London. It was the first time for us at Eco Build where we launched our eco cladding and decking system Woozen which created tremendous interest. Also on display we had Zenolite and our DECOTILE flooring range.

Art Gloss - A New Dimension

Art Gloss - The latest trend for the furniture manufacturing industry, available in six artistic and original designs: Candy Stripe, Black Flower, Black Modern Curve (featured), Black Geometric Wave, White Geometric Wave and Cream Blossom, Art Gloss foils are suitable for both domestic and commercial furniture applications.
